Personal Site Project Rubric

Criteria	1 – Below	2 – Approaching	3 - Meeting	4 - Exceeding
HTML	● Multiple body, html, head, or other unique tags exist ● Elements are left unclosed	● p and br elements are used for spacing between content sections instead of using CSS padding and margins ● div's are used to semantically enclose sections of content	● Content is contained within div's and is spaced and positioned using CSS ● header, p, and other organizational tags are used appropriately	● Classes are used to identify content appropriately ● Multiple classes are assigned to further disentangle CSS
CSS	● Inline styles are used ● No CSS is present ● ids are used more than once in an HTML document	● External CSS sheet is used, but very few modifications have been made to style the site ● The same CSS is used repetitively due to poor attribute selection	● Class declarations are used throughout to apply common styles ● CSS is normalized to prevent browser defaults causing problems	● CSS is well commented and DRY ● Attention has clearly been paid to organizing CSS and making it as reusable as possible
Navigation	● Pages are not linked ● Navigation bars are duplicated throughout site	● Pages are linked via hyperlinked text with no styled menu bar	● Pages are linked via a menu bar that is consistent across pages	● Menu bar contains drop down menus for things like projects
User interface	● Link styles have been overwritten and they are indecipherable from surrounding text ● Navigation between pages is difficult to find, absent, or obscurely named	● Links to content are present in text form ● Links and forms are intuitive	● Links, navigation items, and buttons are intuitive ● Navigation items and images are used to link to content they represent	● CSS is used to animate clickable items on hover indicating that it is actionable

Aesthetic	• No attempt was made to create an attractive, modern aesthetic	• N/A	• Site has a consistent and deliberate approach to web design	• N/A
